

**Cement Council of Texas, in cooperation with  
Texas Concrete Pavement Association, and  
Texas Aggregates and Concrete Association  
Presents**

**Date: April 15, 2009**

**Location: New Braunfels, TX**

# Design and Construction of Concrete Overlays for Streets and Local Roads

Concrete overlays of existing pavements (asphalt or concrete) are a fast and economical way to utilize your in-place road investment, improve function, eliminate poor ride quality, and increase structural capacity. Engineers and construction professionals from local road agencies, as well as consultants and contractors, will learn how to select, design, and construct the most appropriate concrete overlay solutions for your pavement rehabilitation needs. Seminar instructors are pavement experts with years of experience with TxDOT, trade associations, and consulting firms. *A tour (optional) of the Cemex New Braunfels cement plant is included in the registration.*

## Learn how to:

- ◆ Choose and design the right overlay type for your existing pavement conditions.
- ◆ Evaluate the costs and benefits of concrete overlays
- ◆ Construct and maintain concrete overlays in cities, with curb & gutter, underground utilities, driveways, etc.

## Seminar Location:

New Braunfels Civic/Convention Center  
375 S Castell Ave  
New Braunfels, TX 78130  
40 minutes from San Antonio  
60 minutes from Austin

## Seminar Date/Time:

- Wednesday, April 15, 2009
- 8:30 AM—3:30 PM (Seminar)
- 3:30 PM—5:00 PM (Optional cement plant tour, transportation provided)

## Cost:

- Public Agency Employees—\$25
- Private Sector/Other Attendees—\$50
- Continental breakfast and lunch is provided
- Optional tour of Cemex cement plant is included in fees

## Sponsorship/Exhibit Opportunities:

A limited number of sponsorship/exhibit opportunities are available. Please contact Amy Swift (see below) at the Cement Council of Texas for more information.
