**SUCCESS* Event:
Energy Options Series
Sponsored by CPS Energy**

“Renewable Energy: the Good, the Bad and the Challenges”

Many of us know that renewable energy holds great promise for mitigating the world’s current energy and environmental situation. What are less clear are the details of the current successes and challenges that our energy providers face in implementing alternative energy solutions at the macro level. **Mr. Dan Rastler**, Energy Storage Program Manager at the Electric Power Research Institute (EPRI), will discuss the current state-of-the-art in energy storage systems specifically designed to capture and efficiently mass distribute renewable energy. **Mr. Mike Kotara**, CPS Energy’s Executive Vice President of Energy Development, will follow up by explaining where renewables fit within the CPS Strategic Energy Plan. As with our last Energy Options Series meeting, **Mr. Michael Harris** will moderate the Question & Answer sessions after the presentations. At the outset, **Mr. John Bonnin**, CPS Energy Manager of Wholesale Power Marketing, will present an overview of the current renewable energy landscape.

Date and Time

Thursday, 22 January 2009
Doors Open at 5:45 pm
Program begins at 6:30 pm, Q&A at 8:30 pm

Location

Pearl Stable
312 Pearl Parkway

Refreshments

Hors d'oeuvres
Drinks

Entry Fee

None

RSVP via Email to

energyoptions@saccess.org with your name & acronym of your society or organization

Name Tags

Provided to Pre-Registrants, or prepared prior to meeting at check in

Guests

Feel free to bring a guest, whether a SACCESS member or not

Brian Champion, SACCESS President (bcampion@saccess.org)

Michael Harris, SACCESS Energy Options Program Chair (jmharris@cpsenergy.com)

Stephen Juhasz, SACCESS Founder

*San Antonio Council for the Cooperation of Engineering and Scientific Societies
